EXPERIMENT 7

ROLL NO:240701034
NAME:Alvin.B

USER INTERFACE DESIGN

1. Aim

To experiment with different layouts and color schemes for a mobile application and to collect user feedback on aesthetics and usability using GIMP.

---

2. Objective

- To design application layouts using different color schemes
- To analyze the effectiveness of dark theme design
- To collect user feedback on usability
- To improve the design based on feedback

---

3. Tools Used

- **GIMP (GNU Image Manipulation Program)** – for UI design
- **Google Forms** – for collecting feedback

---

4. Application Chosen

Campus Connect (College Service App)

---

5. Designs Created

Design 1 – Dark Theme (Primary Design)

- Background: Dark blue/black
- Text: White
- Buttons: Light blue
- Provides modern and professional appearance
- Suitable for low-light usage

- 
Design 2 – Light Theme

- Background: White
- Text: Black
- Buttons: Blue
- Simple and clean layout

- 
Design 3 – Colorful Theme

- Background: Gradient
- Buttons: Bright colors
- Attractive but slightly complex

- 
---

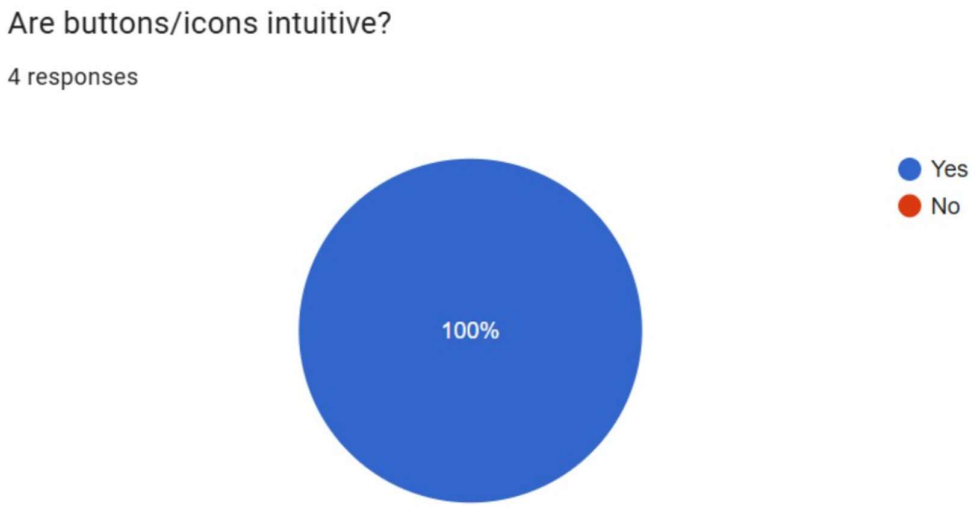
6. Feedback Collected

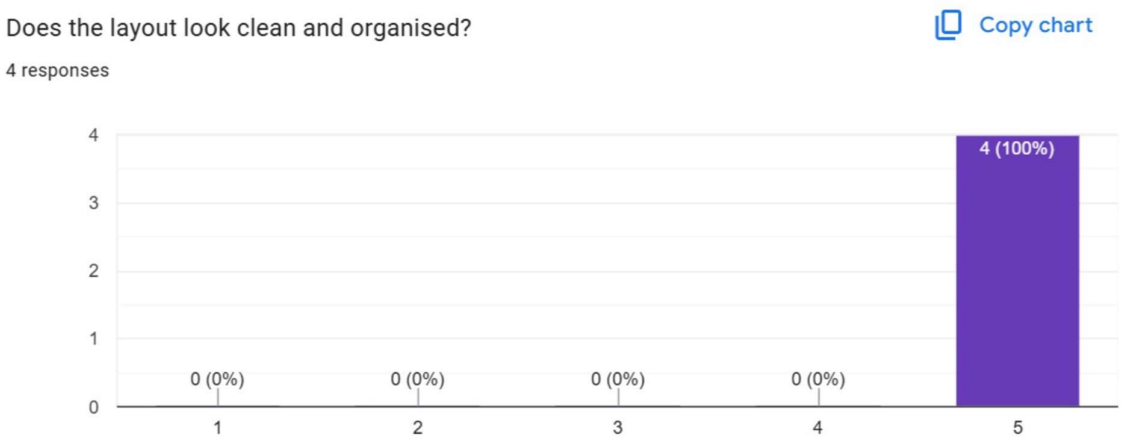
Feedback was collected from users using Google Forms.

Summary:

- Dark Theme → 45%
- Light Theme → 40%

- Colorful Theme → 15%





-

Observations

- Many users preferred dark theme for **night usage**
- Users liked the **modern look** of dark theme
- Some users found light theme easier to read
- Colorful theme was considered distracting

---

7. Improvements Made

Based on feedback:

- Enhanced contrast between text and background

- Increased button size for better visibility
- Improved spacing between elements
- Used consistent color combinations
- Optimized dark theme for readability
